Jump Trading Scholars receive a scholarship and a full fellowship for their 4th and 5th years of study, and graduate with a master’s degree in computer science through the 5-year BS/MS program.

Everyone knows that applied, real-world experience is an integral part of a well-rounded education. That’s why Jump Trading Scholars are guaranteed a paid internship following their 4th year of study.

Candidates for Jump Trading Scholars should be excited, eager, and able to accept the offer to work in Jump’s challenging and dynamic environment.

As a Jump Trading intern, you will get hands-on experience in software development, helping to solve core technology problems in areas like system latency, data analysis, risk management, and more.
